Neha Shaikh
Junior Front-End Developer

Motivated Junior Developer with a passion for creating responsive and user-friendly web apps using HTML, CSS, and JavaScript. Strong attention to detail and committed to delivering high-quality work with ability to work collaboratively in a team environment. Excited to contribute to a dynamic team and develop my abilities as a developer.

Projects

WBS Final Project - Walking Tales

A full-stack (MERN) web app created to help people find friends while working out.

Developed an interactive map using React leaflet to search for locations and map routes and share them with friends.

Implemented chat feature using socket.io.

Also implemented user authorization and authentication.

Modeled and built the database with MongoDB to store user data and manipulate it through user interaction.

Created the application with bootstrap to make it responsive across desktop, tablets and mobile devices.

Pokemon Game

A simple game developed with React, NodeJS and Express. Player can generate random pokemons as opponent to fight with. The winner is declared based on the pokemon characteristics.

Developed an API with Express and NodeJS to serve data to the front-end.

Enhanced the UX/UI of the web app to display cards with flipping feature to display its characteristics.

Online Music Player

An online music player developed with React, NodeJS and Express. The user can add the songs to playlists and the web app also displays recently played songs by the user.

Developed an API with Express and NodeJS to serve data to the front-end.

Experience

2019 - 2020
Surat, Gujarat

Freelancing

Developed dynamic websites for small business using PHP and MySQL in XAMPP environment.

Also implemented jQuery and ajax to enhance the UX/UI and making the websites responsive.

Collaborated with clients to understand their requirements and delivered high-quality work within deadlines.

Improved website search ranking by including keywords and optimizing content with SEO best practices.
